OATES ENVIRONMENTAL LTD 10 Carr Crofts Drive Leeds LS12 3AL

ENVIRONMENTAL POLICY

Ref: ISO14001: 2015

OEL provides waste management solutions, including treatment and disposal of hazardous and non-hazardous waste, and specialise in industrial tank cleaning.

We are aware of the adverse effects that our activities can have on the local, regional and global environment. Either directly or indirectly our operations result in emissions to air and water and the generation of waste.

Environmental management is integral to our vision and performance as a company. We aim to reduce the impacts of our business and to operate in an environmentally responsible manner through continual improvement and pollution prevention.

We are committed to providing adequate resources, information and training to ensure we gain the full co-operation and support of our staff, to help us implement our policy and achieve our objectives and targets.

In this policy statement we commit our company to:

- Comply with all applicable environmental legislation and other requirements to which OEL subscribe to.
- Manage and dispose of waste in a responsible manner.
- Protect the environment by preventing and minimising pollution of land, air and water from our activities, products and services.
- Ensure environmental considerations are taken into account in all purchasing decisions and when selecting and monitoring third parties.
- To reduce our energy consumption through efficient use of resources.
- Reduce the effects of our activities on our neighbors.
- To communicate and cooperate with employees and third parties by making them aware of our environmental management expectations.

As part of our continuing programme of developing and improving our performance we will regularly review our policy to ensure its suitability, adequacy and effectiveness. The Management Team endorses this policy and is fully committed to its implementation.

Signed by the person responsible for Environmental Considerations:

Francis Tebbutt
Facility Technical Manager
